Shifting perspective

Older age should not be an invisible age. It is an
integral part of life, and as such it should be visible,
and celebrated, both in the private and public
space.

In this latter dimension (the public space), neigh-
bourhoods are key to allow for connections and
contributions: neighbourhoods must support and
enable us – physically and socially – to live and age
well and in place.

Together is better

Our project is dedicated to the wishes and dreams
of older people, to understand how they see their
lives, their relationships and networks and the
places they live in. We facilitated their coming
together in neighbourhood groups, to empower
and support each other, to find out about their
aspirations, their talents and to actively shape and
co-create their neighbourhoods.
